Los Journals Springer en IMSS-CONRICYT

#Acceso masivo al conocimiento

CONRICYT ha adquirido Journals, eBooks y Bases de datos de contenido científico y académico publicado por Springer para más de 110 instituciones mexicanas de acuerdo a su perfil de necesidades

Para IMSS:

Publicaciones Periódicas ***Journals***

- Acceso a Perpetuidad a 21 títulos originalmente suscritos en papel
- Acceso a 285 Journals Adicionales de la colección Medicine, Cobertura 1997-2017
- Además, publicaciones Open Access: 560 títulos

En suma, **850** títulos únicos,
Arbitrados, en texto completo y sin periodo de embargo

SPRINGER NATURE

Calidad del contenido

Títulos de alto factor de impacto en 12 especialidades médicas (1)

#Biomedicine:

cancer research, human genetics, drug resistance, medical microbiology, virology, immunology, laboratory medicine

#Internal Medicine & Dermatology:

cardiology & angiology; critical care & emergency medicine; gastroenterology & hepatology; endocrinology & metabolism; rheumatology & dermatology

#Neurology

neuroradiology, neuroscience, neuropsychology

Calidad del contenido

Títulos de alto factor de impacto en 12 especialidades médicas (2)

#Nuclear Medicine:

Imaging / Radiology, Medical and Radiation Physics, Interventional Radiology, Nuclear Chemistry , Diagnostic Radiology.

#Oncology & Hematology:

Surgical oncology, cancer research, radiotherapy

#Orthopedics:

surgical and conservative orthopedics, physiotherapy, rehabilitation medicine, speech pathology

Fragile X premutation in women: recognizing the health challenges beyond primary ovarian insufficiency

Luis R. Hoyos¹ · Mili Thakur^{2,3}

Received: 30 October 2016 / Accepted: 25 November 2016
© Springer Science+Business Media New York 2016

Abstract Fragile X premutation carriers have 55–200 CGG repeats in the 5' untranslated region of the *FMR1* gene. Women with this premutation face many physical and emotional challenges in their life. Approximately 20% of these women will develop fragile X-associated primary ovarian insufficiency (FXPOI). In addition, they suffer from increased rates of menstrual dysfunction, diminished ovarian reserve, reduction in age of menopause, infertility, dizygotic twinning, and risk of having an offspring with a premutation or full mutation. Consequent chronic hypoestrogenism may result in impaired bone health and increased cardiovascular risk. Neuropsychiatric issues include risk of developing fragile X-associated tremor/ataxia syn-

premutation. Awareness of these risks and correlation of the various manifestations could help in early diagnosis and coordination of care and services for these women and their families. This paper reviews current evidence regarding the possible conditions that may present in women with premutation-sized repeats beyond FXPOI.

Keywords Fragile X premutation · Primary ovarian insufficiency · Premature ovarian insufficiency · Fragile X-associated tremor/ataxia syndrome · Health concerns in fragile X premutation carriers

Recuperación de información por búsqueda avanzada

Uso de operadores booleanos, truncaciones

NEAR: devolverá resultados en los que los términos de búsqueda se encuentra dentro de las diez palabras de la palabra "testing", en cualquier orden . Por ejemplo: "system NEAR testing" proporciona resultados en los que la palabra "system" cerca de la palabra "testing".

Asterisco (*) se interpreta como un sustituto para cualquier número de caracteres. Por ejemplo, una búsqueda de hea * devolverá resultados que contengan cualquier palabra que empiece por "hea", como "head", "heats", "health", "heated", "heating". *La búsqueda con asterisco funciona mejor cuando hay al menos 3 caracteres antes del operador.

Signo de interrogación (?) dentro de una búsqueda, se interpreta como un sustituto de una sola letra. Por ejemplo, una búsqueda de hea? solo se obtendrán resultados que contengan palabras de 4 letras que empiezan por "hea", como "head", "heat", "heal".

Diabetologia

ISSN: 0012-186X (Print) 1432-0428 (Online)

Description

Diabetologia publishes original clinical and experimental research within the field of diabetes. We are interested in papers that convey new information or insight into any aspect of the condition, ranging from basic science to clinical applications. These are judged in terms of their scientific quality, novelty, relevance and interest to our broadly based readership.

Diabetologia also hosts editorials, commentaries, debates ... [show all](#)

International Journal of Child Care and Education Policy

ISSN: 2288-6729 (Online)

Description

The International Journal of Child Care and Education Policy (ICEP) has disseminated a wide-ranging collection of articles that cover the breadth of child care and education policy. Jointly published by Korea Institute of Child Care and Education (KICCE) and the National Institute for Early Education Research (NIEER) from May 2013, the journal intends to disseminate research and analysis regarding major issues of child care a ... Búsquedas y **recuperación** de contenido

Recuperación de información por búsqueda avanzada

Uso de operadores booleanos, truncaciones

Comillas (“ ”): Una búsqueda con varias palabras entre comillas devolverá sólo los resultados que las contengan en ese orden exacto.

OR: permite que los resultados sean devueltos, incluso cuando sólo una de las palabras contienen la información. Por ejemplo: **trigo OR maíz** dará resultados que incluyen cualquiera de los términos "trigo" o "maíz".

NOT: excluye los resultados que contengan el término tras el NOT. Por ejemplo trigo **NOT** maíz dará resultados que incluyen el término "trigo", pero excluye el término "maíz".

AND: proporciona los mismos resultados que el valor por defecto en nuestro sitio. Si usted busca “evolutionary patterns of families”, la búsqueda que realmente se lleva a cabo será (**evolutionary AND patterns AND of AND families**).
